## *32x40 Cereal Mill*

The **Ferrell-Ross 32x40 Cereal Mill**  
now includes many improved features  
that compliment the strengths of  
its proven design

**Designed and Manufactured in the U.S.A.**

**NEW STANDARD FEATURES INCLUDE:**

- More Power -** Dual 60 HP drives provide ample power for even the most demanding cereal flaking applications.
- More Accuracy -** Improved roll scraper (mill knife) location and adjustment allow for fine tuning of the blade angle and point of roll contact.
- More Access -** Re-designed roll guards meet safety guidelines while allowing access to roll scraper adjustments and knife warping bolts.
- More Quality -** The rugged mill frame and bearing housing mounting surfaces are machined after fabrication for improved roll alignment and roll gap precision.

**NEW OPTIONAL FEATURES INCLUDE:**

- More Convenience -** 100 amp motor disconnects are mounted to the mill frame and factory wired to motors.
- More Clearance -** Extended frame legs provide more clearance under the mill for cleaning, locating discharge hoppers, conveyors and air locks.
- More Precision -** Fine tuning of roll position is simplified with 0.0007"/0.018mm of travel per hand wheel evolution.
